

ADEDOTUN AYODIMEJI. Product Designer

[email address](#) | +447517423305 | [Linkedin](#) | London, UK.

UX / UI designer with over four years of experience delivering accessible, secure, and visually consistent design solutions for fintech and healthtech products. Skilled in interaction design, prototyping, HTML/CSS, usability testing, design systems, and user research. Known for strategic thinking, strong collaboration, and delivering compliant, scalable digital experiences in regulated environments. Passionate about solving complex problems through intuitive user journeys and continuous improvement.

EDUCATION

Middlesex University, London, UK.

Bachelor of Science - Information Technology

EXPERIENCE

TELUS Health

UX Designer - Internal Tools

London, UK | Oct 2022 - Present

- Designed and iterated on Aura, a business and user management platform for internal use by counselors and HR professionals.
- Worked with engineers and product owners in agile sprints to deliver intuitive interfaces aligned with compliance and security standards, with a strong focus on accessibility and WCAG standards.
- Designed and maintained a scalable design system in Figma, ensuring consistent user experience across the platform and reducing UI inconsistencies by 30 percent.
- Supported the development and rollout of a reporting dashboard, reducing time-to-insight for internal teams by 50 percent.
- Conducted extensive user research and usability testing with internal stakeholders, improving system usability scores by 35 percent.

Byte

Founding Product Designer - Peer-to-peer payment platform

Remote | May 2021 - July 2022

- Led product design for Byte, a fintech platform for payments and expense management, from concept to market launch.

- Owned the design and delivery of Byte's web and mobile platforms, from wireframes to high-fidelity prototypes, focusing on financial service usability.
- Led user research initiatives, interviews, and surveys that uncovered key friction points and directly influenced product decisions and growth.
- Redesigned the onboarding and KYC flow, improving first-time user conversion by 35% and helping scale the user base by 400% in the first year.
- Increased customer acquisition by 80 percent through a redesign of the landing page and app flows, contributing to \$1M in processed payments within six months.

ZapmedX

UX / UI Designer - Health E-commerce Platform

Contract | Jan 2021 - May 2021

- Designed intuitive interfaces for purchasing medicines, booking doctor consultations, and retrieving diagnostic results through a multi-platform experience.
- Collaborated with a cross-functional team of stakeholders and developers to improve checkout and payment processes, ensuring secure and seamless user journeys.
- Led the UI for the payment process, simplifying the checkout experience and improving payment completion rate by 25%, contributing to ₦10 million in annual revenue growth.
- Conducted competitive analysis and usability tests that led to a complete redesign of the pharmacy checkout journey.
- Improved mobile responsiveness and simplified information architecture, resulting in a 15% increase in customer retention during a 6-month post-launch analysis.

PERSONAL PROJECTS

SparkHQ

Founder, Product Designer & Frontend Developer

2023 - Presents

- Launched curated design job board and inspiration platform using CMS and custom front-end.
