London.UK ♦ +447517423305 ♦ [Portfolio/Website](#) ♦ adedotunayodimeji@gmail.com ♦ [LinkedIn](#)

UX/UI Designer with 4+ years of experience crafting both B2B and B2C digital products across web and mobile. Skilled in onboarding flows, complex workflows, payments, and scalable design systems for SaaS, fintech, and health platforms. Passionate about using AI and rapid prototyping to turn ideas into working products, and contributing to the design community through building tools and platforms like [SparkHQ](#).

RELEVANT EXPERIENCE

Product Designer Nov 2024 to Present

Littleseconds: UXUI, Research for AI-assisted appointment management experience.

- Led the end-to-end redesign of the booking and payment flow for small businesses, reducing setup friction and helping owners receive their first confirmed booking faster during the MVP rollout.
- Designed and prototyped an AI-powered assistant that allowed business owners to manage appointments through simple chat interactions, improving task completion speed and lowering reliance on manual scheduling.
- Established a shared design system in Figma covering booking states, payments, and admin tools, improving design consistency and speeding up collaboration between design and engineering as the product evolved.

UX Designer Oct 2022 to Nov 2024

TELUS Health: I focused on improving login, sign-up, and access management experiences for enterprise users.

- Redesigned the login and sign-up experience for employees and business users, reducing friction in account access and improving successful registrations by 70 percent.
- Designed and shipped a single sign-on SSO experience and SAML response dashboard, giving internal teams better control over user access and cutting manual admin work.
- Standardised onboarding flows using shared Figma components and documented patterns, improving design consistency across teams and speeding up engineering handover.

UX Design Lead May 2021 to July 2022

Byte: UX Design, Research, Prototyping.

- Designed end-to-end payment and expense management flows, simplifying how users send money and track spending, which supported a 400 percent growth in the user base within the first year.
- Led user research across onboarding, payments, and KYC journeys, turning insights into clearer flows and content that improved first time user conversion by 35 percent.
- Built and maintained byte design system for web and mobile, improving consistency across the product and helping engineers ship faster with fewer design changes.

UI Designer - Contract Jan 2021 to May 2021

ZapmedX: Design systems and UX/UI for medicine purchase and healthcare.

- Redesigned the pharmacy checkout and payment flow, reducing confusion around prescriptions and pricing, which improved payment completion by 25 percent and supported ₦10 million in annual revenue growth.
- Designed clear, mobile friendly interfaces for buying medicines, booking doctor consultations, and viewing test results, improving usability and contributing to a 15 percent increase in customer retention within six months.
- Worked closely with developers and stakeholders to refine UI patterns and page layouts, creating a more consistent experience across web and mobile and reducing design rework during delivery.

EDUCATION

- **Bachelor of Science, Information Technology | 2022** Middlesex University, London
- **HND Electrical Engineering | 2018** The Polytechnic, Ibadan

SKILLS

Design: UX, UI, Data Visualization, Fintech UX, Information Architecture, Prototyping, Service Design, Design Systems.

Research: A/B Testing, Competitive Analysis, Surveys, Usability Testing, User Research

Tools: Figma, Sketch, Framer, HTML, CSS, JavaScript, Jira, Photoshop, Illustrator, ChatGPT, and Cursor AI.
